

API 570 Inspection, Repair, Alteration, and Rerating of In-Service Piping Systems

The 3 day and 4 day course will provide an intensive overview of API 570 pertaining to piping systems used in refineries, oil sands, petrochemical facilities consistent with the body of knowledge contained in API 570 and other key knowledge elements.

Course Highlights

This course discusses the design, installation, inspection, and rerating of piping systems in refineries, oil sands, petrochemical facilities.

Attendees may register for either of the three (3) day or four (4) day sessions, as best suits the attendees needs. Attendees will be well prepared to challenge the API 570 Inspector certification exam upon completion of the 3 day course. The 4 day course is intended to provide expanded coverage of piping system topics to better equip practitioners in their facility support roles.

Check the API website for dates and costs of the API exam. Inspection, engineering and maintenance practitioners and their management will find relevance in this course to meet the challenges of their facility roles.

Cost - is CDN \$ 1,985 (3 day); \$ 2,625 (4 day) + GST (for Canadian residents) or USD \$1,575 (3 day); \$ 2,100 (4 day) & (tax not applicable) for international attendees; pricing is for 1st attendee, 25% discount applies for each additional attendee. Payment by cheque or purchase order; payment to be received as noted below to ensure placement. API certification exam registration and fees must be arranged with API prior to the exam.
