

API 936 REFRACTORY DESIGN, MAINTENANCE & EVALUATION

This three-day course will provide an intensive overview of refractory materials used in refineries, oil sands, petrochemical facilities and power generation plants consistent with the body of knowledge contained in API RP 936 and other key knowledge elements.

Course Highlights

This course discusses the design, installation, inspection, and repair of refractory systems in pressure vessels, exchangers, piping, boilers, and fired equipment. The discussions include refractory systems in demanding HPI applications, such as FCCU's, Fluid Cokers, SRU's and TCCU's and are illustrated by photos and video.

The course will present these topics in the context of API Recommended Practice 936 Guidelines for Refractory Installation Quality Control. Additional topics will be covered for maximum advantage to the attendee. Attendees will be well prepared to challenge the API 936 Inspector certification exam upon completion of this course. Check the API website for dates and costs.

Cost is CDN \$ 1,895 + GST (for Canadian residents) or USD \$1,500 (tax not applicable) for international attendees; pricing is for 1st attendee, 25% discount applies for each additional attendee. Payment by cheque or purchase order (net 30 days); payment to be received as noted below to ensure placement. API certification exam registration and fees must be arranged with API prior to the exam.
